Teacher's Feedback on Curriculum

2022-23

Action Taken Report

Based on this feedback, several actions are recommended. A thorough review of course content to further align with emerging industry trends and technological advancements was conducted. More hands-on projects, internships, or industry collaborations were introduced to bolster practical application skills. The options to enhance flexibility through elective courses, interdisciplinary programs, or personalized learning pathways were explored. Innovative assessment techniques such as project-based assessments, peer reviews, or simulations to better gauge student understanding were introduced.

While the feedback indicates overall satisfaction with our curriculum and teaching methods, there are clear opportunities to enhance our offerings to better meet the dynamic needs of students and industry expectations. This action-oriented approach will ensure continuous improvement and maintain our commitment to delivering high-quality education.
